

COMPANY OVERVIEW

Civic Automation Systems is a specialized, HUBZone-certified data infrastructure firm supporting federal Prime contractors. We operate as an asynchronous back-office, utilizing proprietary Python and Natural Language Processing (NLP) architectures to extract, normalize, and format complex acquisition data. We deliver flawlessly formatted, audit-ready Excel models within strict 4-to-24 hour SLAs, allowing Prime capture teams to reallocate human capital to proprietary writing and solutioning.

CORE COMPETENCIES

1. Automated RFP Compliance Matrix Generation

4-HR SLA

- Ingestion of public 200+ page government RFPs via encrypted channels.
- Stateless NLP extraction isolating all mandatory "shall, must, and will" requirements.
- Automated mapping of Section L/M evaluation criteria and weighting notation.
- Delivery of color-coded, section-referenced Excel Compliance Matrices within 4 hours.

2. Sub-Tier Pricing Normalization

12-HR SLA

- Ingestion of highly disparate, unstructured sub-tier labor rate cards (PDF, Word, Excel).
- Automated normalization and cross-walking of labor categories to federal conventions.
- Delivery of a unified, audit-ready master Excel pricing model with anomaly flagging.

3. FOIA & Price-to-Win (PTW) OCR Extraction

24-HR SLA

- Utilization of machine-vision OCR pipelines to process flattened, scanned incumbent FOIA releases.
- Reconstruction of competitor pricing tables and loaded rates into structured Excel formats.
- Historical burn-rate mapping and period-of-performance extraction for recompetete targeting.

INFRASTRUCTURE & COMPLIANCE POSTURE

THE BLACK BOX METHODOLOGY

Zero integration required with Prime enterprise networks. No API keys or software deployment.

STATELESS PROCESSING

Operations utilize enterprise-grade, zero-retention APIs. Processing environments are isolated and ephemeral.

ZERO TRAINING POLICY

Client-furnished acquisition documents are never used to train, fine-tune, or evaluate commercial artificial intelligence models.
